

ITET/WAIE 2020 keynote speech by Prof. Siu Cheung KONG

Title:

Reimage Learning, Teaching and Assessment in Higher Education for Future Readiness

Abstract:

The whole education sector over the world has faced the uncertainty to suspend on-campus classes since the early 2020 due to the outbreak of Coronavirus Disease 2019 (COVID-19). Higher education institutions inevitably face such uncertainty and make a sudden but necessary switch to the full online teaching and learning mode - to arrange all teaching and learning activities to be delivered online. This speech will share the lessons learned for such switch of teaching and learning mode - in the dimensions of learning, teaching and assessment - based on the experience from the sole publicly funded higher education institution in Hong Kong. Potential practices will be discussed for the insights on engaging students in active, constructive, interactive and reflective learning during the full online teaching and learning process, with the goal at fostering students' personal, academic and social growth.
